

Sisel® Intrépid

Anti-Wrinkle System

Look 20-30 Years Younger in 30 Minutes.

Rid your face of the appearance of aging with this incredible highly advanced formulation. Quickly and smoothly helps remove the unsightly appearance of wrinkles, eye bags and crow's feet with just a daily application. No injections, no masks and no more having to look at your aging face.

The **Sisel® Intrépid** Anti-Wrinkle System is comprised of three components: Base, Activator and Remover.

Eye bags & circles under eyes will really seem to disappear *before your very eyes* in just 20-30 minutes! With Intrépid, your skin will look and feel smoother. Unsightly eye bags and circles will seem to vanish with each application. Crow's feet, lip and brow lines, and sagging skin's unsightly appearance will just simply go away!

By simply rubbing the Intrépid base and activator deeply into affected areas, your skin will appear years younger. Intrépid is especially effective in dealing with problem areas around the eyes. With each application, you will notice a visible improvement with crow's feet and those untidy wrinkles around your eyes and skin. Forehead lines, lip lines and wrinkles will be no longer evident!

*Who says you
never get a
second chance at
a first impression?*

FEATURES AND BENEFITS

- Reduces the appearance of wrinkles, puffy and droopy eyelids, eye bags, lip and brow lines.*
- One application can last for up to 24 hours.
- Waterproof, works in minutes, quick and easy to apply.

DIRECTIONS

1. Wash your skin and remove any makeup or lotion so the skin is bare and dry.
2. Daub Intrépid Base generously onto the area around the eyes, lip & brow lines, crows feet, wrinkles or sagging skin. Then rub the Base in fully until thoroughly absorbed and the Base is in good contact with the skin. It's important that the base layer is not thin but a rather generous, plentiful, but not an excessive film on the surface of the skin. Feather Base outward to smooth edge. Clean any residue off your finger before you apply the Activator.
3. Apply the Intrépid Activator over the Base using about half of the amount that you used for the Base. Rub in thoroughly, mixing into the Base until the skin starts to feel slightly tacky (about 10 seconds). Thorough mixing with the Base is important so that it can react properly. You will feel your skin stretching and tightening within 2-3 minutes as Intrépid contracts, firms and smooths out wrinkles and eye bags. Do not rub the Activator too long or the Intrépid will start to ball up. Once you are finished do not touch it again until dry.
4. Maintain a neutral expression—avoid smiles, frowns or squinting to prevent additional wrinkle lines—as Intrépid firms and dries. Recommended time is 20-30 minutes. This is the perfect time to do other personal care tasks such as combing hair or brushing teeth.

To Remove:

Using applicator or a cotton swab, spread a light coat of the Intrépid Remover, completely covering the Intrépid cured Base film. Let it sit for 15 to 30 seconds. As the Intrépid starts to collapse, wipe off with a tissue or towel. Repeat as necessary. Rinse and dry skin.

Attention: Make sure to clean hands between each step. Do not cross-contaminate components with each other, it will react and damage the product. Results may vary slightly by skin type. Sisel Intrépid comes in three distinct shades to match any skin tone – Light, Medium & Dark. You can mix any combination to better match your skin in case one of the three tones is not just right for you.

CAUTION

For external use only. Avoid direct eye contact. If product gets into eyes, rinse thoroughly with water. If irritation or redness occurs, discontinue use. Keep out of reach of children.
